

The Northern San Luis Valley Conservation Roundtable presents a

# GMO PANEL

Join the Northern San Luis Valley Conservation Roundtable, a unique group of regional landowners, ranchers, farmers, land trusts, wildlife managers and other federal agencies, in open discussion on October 22 as we share resources and information and work to proactively conserve our natural resources and local heritage.

The NSLVCR Meeting is open to the public and will run from 4-5. Hear organization and agency updates from participants including District Ranger Jim Pitts debriefing on what an upcoming **Rio Grande National Forest, Forest Plan Revision** means to the community. The meeting will be followed by a short break for networking and refreshments.

Our GMO PANEL will begin at 5:30. Join the discussion of GMO use in the Northern San Luis Valley. Hear from local ranchers and farmers who pose the question, **should Saguache County ban GMO's?** Consider the implications of GMO's to soil health, seed sharing, and the local economy.

Get informed **BEFORE** the November vote on Prop 105 to **LABEL GMO FOOD!**
